

Established in the last quarter of 2001, CRV AIRCON AND PLUMBING SERVICES is a single proprietorship company.

- is specialized services in the installation of air-conditioning and mechanical ventilation system, plumbing and sanitary system, fire protection system, chilled water piping, pipe insulation, duct insulation and cladding work.
- is also specialized in servicing of centralized air-conditioning, chiller screw type, Air Handling Unit, Fan Coil Unit, cooling tower, water pump, and mechanical ventilation system.
- is confident enough to have accomplished the work with the satisfaction of the client.
- is in the business for less than a year to its credit but the management, staff and manpower force behind it has been in this field for more than fifteen years and yet we also expanded our line of expertise in engineering and construction industry.

With the competition that characterizes the market, CRV is undergoing a transformation at all of its operation with an emphasis on improving if not perfecting its quality of service and workmanship responsive to its modern technology.

Year 2002 is yet to be seen but for CRV each year is a challenging one with the advancement in technology and construction strategy. The company shall continue to aim for growth and profitability through the use of modern strategies and quality services.

CRV AIRCON AND PLUMBING SERVICES hopes that the coming years will bring the best in each one of us in the business.
